Regardless, the default camera controls work well enough. You have the ability to switch between four side angles and one overhead view for a better look at your immediate surroundings. The unusual concept is nicely executed and enjoyable. The object of the game is to steer a ball using your keyboard across twelve vertigo-inspiring levels that become increasingly difficult as you progress. apk file and play the best 3d puzzle control game. Shifting between them equals to changing your body mass, adding new depth to puzzle solving.

Certain parts of each level will require you to switch between materials in order to progress. Paper is lightweight and easy to control, rock is heavy and cumbersome while wood is somewhere in between the two extremes. The controls are so simple and basic that anyone can handle them, which is why I find it strange that Balance doesn't go that extra mile to offer gamepad support (or a mouse view for that matter). Some parts of the later game have large-scale puzzles with multiple intertwined paths that become confusing, making me wish the game had an autopilot function to better understand my surroundings.
